# Rock Creek

Contract #

Jas. Young

Kimberly, Idaho

N.E. SE. 21-11-18

Thirteen wells were drilled and the following  
tile laid on this land:

<u>6"</u>	<u>8"</u>	<u>10"</u>	<u>12"</u>
1620'	890'	920'	530'

These wells were drilled during the winter  
of <sup>1917</sup> 1918 - at which time the water table was  
about 10 feet from the surface. On June 24  
1918 - water was flowing from all of these  
wells except the two highest.

It is very probable that more wells will  
have to be drilled on this land.

21<sup>3</sup> Acre are affected

A. H. H. H.

June 27 1918

Note: - I can not find a contract  
covering this

cut

work done Oct. 1917

Joe Younger  
Kimberly, Idaho.

Job No. 132

NE<sup>4</sup> SE<sup>4</sup> Sec. 21-11-18.

21.3 Acres drained.

13 wells drilled

6 in. tile	8 1/2" tile	10" tile	12" tile
1620'	890	920	520

The surface of this land was dry but covered with alkali. There is no crops on the land but it is being irrigated with the intention of washing the alkali off. Where the water had wasted across the land, wheat, sweet clover & alfalfa is growing which makes one believe that it can be reclaimed by surface washing.

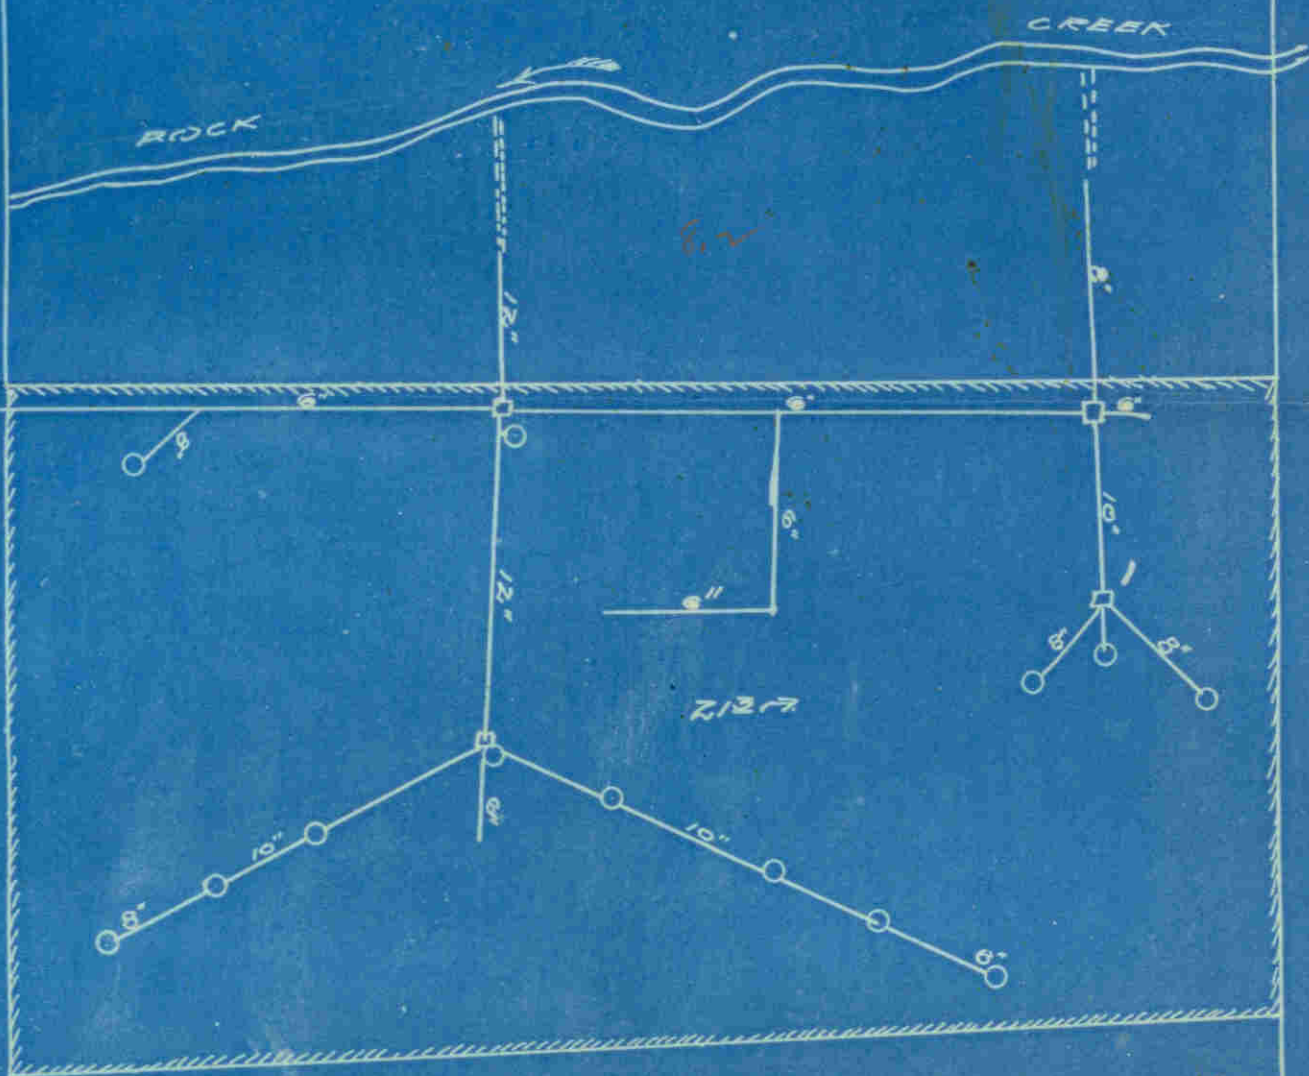

The land is naturally full of alkali as it is all greasewood land just north and east of this land.

We believe the land is drained but not reclaimed.

The open drains should be cleaned out.

July 24 - 1920
